About

Food waste matters!

WasteNot:WantNot! is here to help!

In 2021, the Food and Agriculture Organisation of the United Nations estimates that **one third of all food produced in the world is lost or wasted**, while other analysis suggests **8.4 million** people in the UK are **struggling to afford to eat**.

The environmental impact of food waste is also significant. In addition to being a contributor to habitat and biodiversity loss, the WWF reports that **food waste is responsible for 9% of total global GHG emissions** - an increase from the previous estimate.

WasteNot:WantNot! is an App which provides **solutions to food wastage** by incorporating food planning, conscious purchasing and **donating** practices into your everyday life.

Together let's be the sustainable change the world needs!
